SMRUTI RANJAN DASH

Systems Engineer | Python Development | Data Engineering | Automation

Bhubaneswar, Odisha, India | smrutiranjandash184@gmail.com | github.com/Smruti184 | linkedin.com/in/smruti184

PROFESSIONAL SUMMARY

Early-career technology professional and Systems Engineer at Tata Consultancy Services with a B.Tech in Computer Science and Information Technology. Hands-on experience with Python-based web crawling, product data extraction, browser automation, and data storage using SQL and MongoDB. Interested in building reliable data pipelines and pursuing opportunities in Python development, Data Engineering, analytics, and AI-enabled solutions.

TECHNICAL SKILLS

Programming: Python, Java, JavaScript, Object-Oriented Programming
Data & Databases: MySQL, MongoDB, Pandas, data extraction, ETL fundamentals
Web & Automation: Requests, BeautifulSoup, lxml, Selenium, Playwright, HTML, CSS, Bootstrap
Tools & Platforms: VS Code, Eclipse, Git, Databricks; Azure learning in progress

PROFESSIONAL EXPERIENCE

Systems Engineer – Digital | Tata Consultancy Services (TCS) | Jun 2026 – Present

• Completed TCS Initial Learning Program (ILP) training and transitioned into the Systems Engineer – Digital role.
• Building enterprise technology experience while developing skills in Python, data engineering, AI, and software development.
• Seeking opportunities to contribute to development and data-focused delivery teams.

Analyst Apprentice | eClerx | Nov 2025 – Jun 2026

• Worked on web crawling workflows, including collecting product detail page URLs from SQL databases and extracting product information.
• Used Python libraries and browser automation tools including Requests, lxml, BeautifulSoup, and Selenium.
• Worked with MongoDB for storing extracted data and proxy services to support crawling workflows.

PROJECTS

Automated Product Data Extraction
Built practice and work-related workflows for collecting product information from web pages using Python, Requests, lxml, Selenium, and proxy APIs; structured extracted data for downstream storage.

Fashion Brand Data Scraper
Developed a Python web-scraping project using BeautifulSoup to extract and organize product information from fashion websites.

Books & IMDb Data Collection
Created web data collection practice projects to gather structured book and movie information for further exploration.

EDUCATION

B.Tech – Computer Science and Information Technology | GITA Autonomous College, Bhubaneswar | 2025
Diploma – Electrical Engineering | Government Polytechnic, Bhubaneswar | 2021

CERTIFICATIONS & TRAINING

• Databricks Certified Data Analyst Associate
• Wipro TalentNext – Java Full Stack training
