EXPERIENCE

Systems Engineer — Jun 2026 – Present
Tata Consultancy Services — Bhubaneswar, Odisha

- Working as a **Systems Engineer** at TCS and undergoing ILP training in **Java Full Stack Development**.
- Training in Core Java, OOP, SQL, HTML, CSS, JavaScript, and database concepts.
- Building hands-on experience in Java application development through training, assessments, and projects.

Analyst — Nov 2025 – Jun 2026
eClerx Services Limited — Remote

- Developed **Python automation scripts** for web scraping and crawling.
- Fetched URLs from **SQL databases** and extracted data using Python, Pandas, Requests, and LXML.
- Used **proxy APIs** (ScrapeOps, ScraperAPI, ScrapingBee) to handle blocked requests and anti-bot issues.
- Processed and stored scraped data in **MongoDB and CSV**.
- Troubleshot **HTTP errors, website changes, failed requests, duplicate data, and scraping issues**.

SKILLS

Programming Languages: Java, Python, JavaScript

Web Technologies: HTML, CSS

Web Scraping & Automation: Requests, lxml, BeautifulSoup, Selenium

Databases: MySQL, MongoDB

Data & Development: Pandas, DSA, OOP

Tools & IDEs: VS Code, Jupyter Notebook, Eclipse, JIRA

Soft Skills: Adaptability, Problem-Solving, Team Collaboration, Communication, Continuous Learning, Analytical Thinking

EDUCATION

B.Tech. (Computer Science and Information Technology) — 2022 – 2025
GITA Autonomous College, Bhubaneswar — Bhubaneswar, India

Diploma/Polytechnic (Electrical Engineering) — 2018 – 2022
Government Polytechnic, Bhubaneswar — Bhubaneswar, India

10th — 2017 – 2018
Saraswati Shishu Vidya Mandir, Dharmavihar, Bhubaneswar — Bhubaneswar, India

PROJECTS

Automated Product Data Scraping using Python

- Extracted 1000+ Product Detail Page **(PDP)** URLs and scraped product information (**name, price, ratings, reviews, specifications, images, availability**) using **Python Requests + lxml.**
- Leveraged API endpoints and proxy services (**ScrapingBee, ZenRows**) to bypass anti-bot measures and handle pagination, dynamic content, and rate limits efficiently.
- Processed and stored cleaned data using Pandas into **MySQL database**, **CSV**, and **Excel** files for analysis and reporting.

Automated Product Data Scraping using Selenium & Playwright

- Extracted all Product Detail Page (PDP) URLs from category and listing pages automatically.
- Scraped complete product data including name, price, ratings, reviews, specifications, images, and availability using PDP URLs.
- Utilized API endpoints to fetch structured product data in JSON format for improved speed and accuracy.
- Handled dynamic content, pagination, and lazy loading effectively.
- Tools Used: Python, Requests, Selenium, Playwright, lxml, JSON

Web Scraping Fashion Brand Data using BeautifulSoup

- Extracted brand names, URLs, and metadata from fashion e-commerce sites.
- Cleaned and stored data in Excel using **pandas**.
- Tools Used: **BeautifulSoup**, **Requests**, **pandas, lxml**

TRAININGS/CERTIFICATES

- Databricks Certified Data Analyst Associate
- Java Full Stack and Testing: KodNest
- Java Full Stack Development: WIPRO TalentNext

ACHIEVEMENTS/EXTRACURRICULAR ACTIVITIES

Served as a Coordinator in GITA Annual Fest Ustah'2024 and Ustah'2025

Volunteered at the IEEE International Conference on AI and QC (ICAIQC) at GITA Autonomous College
